

**INTERMADE.LU**

Your intermediary between needs & results

Consulting Company providing expertise and advices  
around Collaboration, Communication solutions, Cloud & Business Intelligence

Who we are?

What we believe in?

What we deliver?

Our solutions...

# Who we are?

We are a team specialized in **SharePoint, Office 365, Business Intelligence and Unified Communications solutions**

- We provide independent advice and expertise on these topics
- We have functional experience, technical expertise and provide end-user oriented solutions

Who we are?

**What we believe in?**

What we deliver?

Our solutions...

# What we believe in?

For enterprise solutions, **Office 365 & SharePoint** can offer a lot of functionalities and fulfill most requirements

- It is an ideal solution for Content Management, Intranet, Extranet, Business Intelligence, Document Management, Mobile access, content sharing, team-working as a department or on an enterprise-wide level, and for social networking
- **Well implemented and well managed**, SharePoint 2013/2016 & Office 365 are solutions to most problems and challenges that every company (regardless of its size; small, medium or large) wants to resolve quickly, efficiently, and cost-effectively

# What we believe in?

A competitive solution **starts with out-of-the-box solutions and functionalities**

- This means that the time where everything is developed from "start to production" is gone, making it more efficient and cost-effective
- Nevertheless, some specific projects can have a lot of development (like in traditional .Net or in JavaScript)

# What we believe in?

SharePoint,  
as a platform or tool,  
**should not be used  
for all solutions**

- As we are completely independent from the various publishers, we can provide real and objective advice for your needs and requirements
- We can say whether your project should not be done on SharePoint to be sure that you get a highly efficient and cost effective solution...
- That's why being independent is critical for us

Who we are?

What we believe in?

**What we deliver?**

Our solutions...

# What we deliver?

For SharePoint, Office 365, Business Intelligence  
and Unified Communications solutions

- Business & Functional Analysis
- Project Management
- Development
- Governance
- Solution Architecture
- Technical Expertise
- Migration

# What we deliver?

- We can help you on the **management of your Project**
  - We can create the Design specifications (Business, Functional and/or technical)
  - We can manage your Steering Committee meetings
  - We can organize all project phases
  - We can manage the Functional recipe of the project
- We can provide independent **Advice**
  - On selecting a product like SharePoint
  - On the infrastructure part
  - On mobile and phone aspects
  - On language development
  - On the choice of a provider; on creating a team
  - On the utility (or not) to use SharePoint or a migration

# What we deliver?

- We create **SharePoint Governances**
  - We can define all business/technical and/or technological governances with you
  - We can create your service request
  - We can provide you with best practices for an efficient release management
  - We can manage the governances for your personal cloud and/or for Office 365
- We create **Architectures**
  - We can create the best efficient Technical architecture for your implementation and usages of SharePoint
  - We can provide the new Development architecture for SharePoint
  - We can create a powerful architecture and flows to integrate Data/documents (to SharePoint/Office 365) from internal third-party repositories such as CRM, Live Link, ERP/SAP or other with your teams

# What we deliver?

- We help you on the **personalization and graphic improvements**
  - We can provide advice on the development stack (JS/Jquery, HTML5/CSS, JSON/REST...)
  - We can coach & train your internal Developers
  - We can develop your solution
  - We take into account Mobile/Phone specifications
  - We can help your designer to create an efficient responsive design
- We help you on **updating** SharePoint
  - We can create the best Update Planning for you
  - We can develop and test Rollback methods for a future update
  - We can implement the updates on SharePoint for all your environments (Dev/Test/QA/Prod)

# What we deliver?

- We **develop your solution**
  - We can develop your solution in .Net and/or in JavaScript
  - We can help you to use the best state-of-the-art development methods and solutions
  - We can create a Prototype (or a proof-of-concept) of your solution in order to validate that the final development will be as your business users expect it to be
  - We make all necessary actions to help you on the future support of the application
  - We can build all necessary packages and deployment scripts in order to have an efficient solution that can be transported and updated easily from all your environments (DEV/TEST/QA/Prod/Office 365)
  - We can help you to choose efficient third party tools if needed
  - We can create the User Guide & the Technical Documentation

# What we deliver?

- We **Migrate** data or documents for you
  - We can migrate data from potentially any repository to SharePoint; from SharePoint 2010 to 2013 or 2016; from SharePoint to Office 365
  - We define the migration schedule and agenda
  - We define the technical solution
  - We can help you on the choice of the migration tool
  - We can make the migration itself or help your team to migrate data
  - We manage exceptions and errors
  - We can provide Data Validation methods
  - We can complete the migration

Who we are?

What we believe in?

What we deliver?

**Our solutions...**

# Easy Share

Simplify SharePoint

- **Easy-to-use solution** providing...
  - Rooms Management
  - Document Management with automatic documents versioning
  - Alerting to be notified for new/edited documents on selected Rooms
  - Agenda connected to Exchange with selection of Attendees and visualization of response of all attendees
  - Tasks management connected to Outlook Tasks
- **For ...**
  - For middle/top-management to share documents easily
- **Portable solution**
  - Provide a responsive Layout and can be used with PC, Tablet and Smartphones
  - Can be on-premises or on Office 365

# Easy Agenda

Simplify Appointments Management

- A fully **automated solution** to create and manage **appointments**

## For patient

- Take an appointment by phone quickly, efficiently and easily via an intuitive menu options
- 24/24 & 7/7 from any mobile or phone
- Leave a voice message that you can hear from your Email address and treat in time
- To use a local phone number to make an appointment
- To receive a reminder SMS the day before the appointment or 1 hour before

## For the professional

- To plan and better manage appointments
- Don't be interrupted during consultations, allowing to focus on your patients
- Inform your patients and absences leaves directly after the greeting
- Manage and view your Outlook calendar (*as a basis for the appointment decision*) from a computer, a mobile, a Tablet, an iPad, or just from a browser
- To provide a single local call number and personal; allocated to you by us
- Transfer your calls when needed when you want
