INTERMADE.LU

Your intermediary between needs & results

Who we are?
What we believe in?
What we deliver?

Who we are?

We are a team specialized in SharePoint, Office 365, Business Intelligence and Unified Communications solutions

- We provide independent advice and expertise on these topics
- We have functional experience, technical expertise and provide end-user oriented solutions

Who we are?

What we believe in?

What we deliver?

What we believe in?

For enterprise solutions, Office 365 & SharePoint can offer a lot of functionalities and fulfill most requirements

- It is an ideal solution for Content Management, Intranet, Extranet, Business Intelligence, Document Management, Mobile access, content sharing, team-working as a department or on an enterprise-wide level, and for social networking

- **Well implemented and well managed**, SharePoint 2013/2016 & Office 365 are solutions to most problems and challenges that every company (regardless of its size; small, medium or large) wants to resolve quickly, efficiently, and cost-effectively

What we believe in?

A competitive solution starts with out-of-the-box solutions and functionalities

- This means that the time where everything is developed from "start to production" is gone, making it more efficient and cost-effective
- Nevertheless, some specific projects can have a lot of development (like in traditional .Net or in JavaScript)

What we believe in?

SharePoint,
as a platform or tool,
**should not be used
for all solutions**

- As we are completely independent from the various publishers, we can provide real and objective advice for your needs and requirements
- We can say whether your project should not be done on SharePoint to be sure that you get a highly efficient and cost effective solution...
- That's why being independent is critical for us

Who we are?

What we deliver?

What we deliver?

For SharePoint, Office 365, Business Intelligence
and Unified Communications solutions

- Business & Functional Analysis
- Project Management
- Development
- Governance
- Solution Architecture
- Technical Expertise
- Migration

What we deliver?

- We can help you on the management of your Project
  - We can create the Design specifications (Business, Functional and/or technical)
  - We can manage your Steering Committee meetings
  - We can organize all project phases
  - We can manage the Functional recipe of the project
- We can provide independent Advice
  - On selecting a product like SharePoint
  - On the infrastructure part
  - On mobile and phone aspects
  - On language development
  - On the choice of a provider; on creating a team
  - On the utility (or not) to use SharePoint or a migration

What we deliver?

- We create SharePoint Governances
  - We can define all business/technical and/or technological governances with you
  - We can create your service request
  - We can provide you with best practices for an efficient release management
  - We can manage the governances for your personal cloud and/or for Office 365
- We create Architectures
  - We can create the best efficient Technical architecture for your implementation and usages of SharePoint
  - We can provide the new Development architecture for SharePoint
  - We can create a powerful architecture and flows to integrate Data/documents (to SharePoint/Office 365) from internal third-party repositories such as CRM, Live Link, ERP/SAP or other with your teams

What we deliver?

- We help you on the personalization and graphic improvements
  - We can provide advice on the development stack (JS/Jquery, HTML5/CSS, JSON/REST…)
  - We can coach & train your internal Developers
  - We can develop your solution
  - We take into account Mobile/Phone specifications
  - We can help your designer to create an efficient responsive design
- We help you on updating SharePoint
  - We can create the best Update Planning for you
  - We can develop and test Rollback methods for a future update
  - We can implement the updates on SharePoint for all your environments (Dev/Test/QA/Prod)

What we deliver?

- ## We develop your solution
    - We can develop your solution in .Net and/or in JavaScript
    - We can help you to use the best state-of-the-art development methods and solutions
    - We can create a Prototype (or a proof-of-concept) of your solution in order to validate that the final development will be as your business users expect it to be
    - We make all necessary actions to help you on the future support of the application
    - We can build all necessary packages and deployment scripts in order to have an efficient solution that can be transported and updated easily from all your environments (DEV/TEST/QA/Prod/Office 365)
    - We can help you to choose efficient third party tools if needed
    - We can create the User Guide & the Technical Documentation

What we deliver?

- We **Migrate** data or documents for you
  - We can migrate data from potentially any repository to SharePoint; from SharePoint 2010 to 2013 or 2016; from SharePoint to Office 365
  - We define the migration schedule and agenda
  - We define the technical solution
  - We can help you on the choice of the migration tool
  - We can make the migration itself or help your team to migrate data
  - We manage exceptions and errors
  - We can provide Data Validation methods
  - We can complete the migration
